ROTECK®

Detection with a difference…

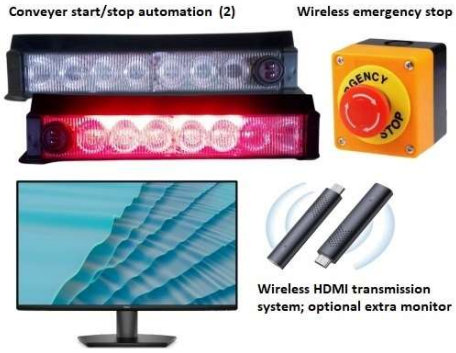

You operate already an x-ray scanner?

Congrats, now you can save space, power, and cost with our unique wireless upgrade kits.

- Our remote automation does not require any entry or exit tables, safes space.
- Our remote automation controls the power consuming conveyor automatically, saves electricity.
- Our remote automation makes the onsite operator obsolete, saves costs.
- Our remote automation operates smooth and very discrete in any environment (e.g. Hotels).
- Our remote automation operates bidirectional, suitable for check-in and check-out.
- Our remote automation is unique, and fits all scanner brands and sizes.

What does our remote automation entail?

- Two start / stop automation units with built in red / green status lights, setup and installation.
- Wireless plug in monitor extension for up to 50 m range (e.g. at your reception)
- Wireless emergency stop button. Extra monitor (optional)
- Wireless conveyer operation buttons (optional)

What are the advantages aside from saving space, power, and cost?

- Less radiation impact to the operator.
- Fully or semi automated operation from a safe distance.
- Discrete background operation, multi view via network feed.
- Less wear & tear, less maintenance.

What does discretion and confidence cost?

- Free with any new scanner purchase.
- R 11.500 + VAT for easy self installation (requires some soldering)
- R15.500 + VAT fully installed in Gauteng.
- Got your scanner from TEMU, Alibaba, or a “BEE compliant tenderpreneur”? We got you covered! Free call out (Gauteng only) and fault examination; we only charge after successful service/repair.
